Education

Politeknik Negeri Jakarta

Diploma III of Mechanical Engineering
GPA: 3.43/4.00

Depok
2018

Experience

Software Engineer (Full-Stack)

Delegasi (Full-Time)

- Spearheaded development as a founding engineer, architecting the entire technical infrastructure from ground up.
- Drove product engagement metrics, achieving over 50% Weekly Active Users/Monthly Active Uses (WAU/MAU) ratio.
- Independently designed, built, and scaled B2B Payment platform from conception to processing over \$3M USD in transactions within 12 months.
- Implemented CI/CD pipelines and established engineering best practices, enabling rapid iteration and product deployments.

Remote
Jan 2023 - May 2025

Software Engineer (Full-Stack/Odoo)

Segarloka (Freelance)

- Independently developed and maintained odoo module.
- Built AI workflow for customer service operations from scratch, decreasing input time from minutes to seconds.
- Built an entire digital system from 0 revenue to billions of rupiah monthly revenue.

Remote
2021 - 2025

Technical Co-Founder

Fix AI (Part-Time)

- Designed and developed Chrome Extension using Plasmio, React, and TypeScript that integrates AI agents for customer support, improving user experience and issue resolution time by more than 40%.
- Built end-to-end AI Agents using TypeScript for comprehensive customer support solutions.
- Conducting in-depth research for AI-based product development and market opportunity identification.

Remote
Jun 2024 - Jan 2025

Software Engineer II (Backend)

BukuWarung (Full-Time)

- Developed an e-wallet system with high code quality.
- Created automation tools for the operations team that reduced issue resolution time from dozens of manual interventions per day to less than 10 minutes daily.

Remote
Jan 2022 - Nov 2022

Software Engineer (Backend)

Traveloka (Full-Time)

- Developed TravelokaPay e-wallet with >50% unit test coverage to ensure system stability.
- Developed a new product (environmental management fee) from scratch in e-Bill system.

Remote
May 2021 - Jan 2022

Software Engineer (Backend & Desktop)

Alterra (Full-Time)

Malang & Remote
Sep 2019 - May 2021

- Revamped modern desktop ERP application from scratch using .NET technology, improving performance and user experience.
- Built an automation system that helped the infrastructure team reduce production deployment time from 1 day to just 5 minutes.

Additional

Language Skills: Bahasa Indonesia and English.

Technical Skills: TypeScript/JavaScript, Python, React, Java, Odoo
